

IT Security Device Classifications

A comprehensive list of classifications, descriptions, and prominent vendors/devices.

Security Technology Classifications with CIM Data Models

#	Classification	Description	Examples (Vendors & Devices)	Applicable CIM Data Models
1	Firewalls	Controls inbound and outbound network traffic based on security rules.	Cisco ASA, Palo Alto NGFW, Fortinet FortiGate, Check Point, Juniper SRX	Network_Traffic, Network_Sessions, Intrusion_Detection
2	IDS / IPS	Monitors and blocks malicious network activity.	Snort, Cisco Firepower IDS/IPS, Fortinet IPS, Trend Micro TippingPoint	Intrusion_Detection, Event_Signatures, Alerts
3	Unified Threat Management (UTM)	Combines multiple security functions into a single device.	Fortinet FortiGate UTM, Sophos XG, Cisco Meraki MX, SonicWall TZ	Network_Traffic, Intrusion_Detection, Malware
4	Web Application Firewall (WAF)	Protects web applications from HTTP-based attacks.	F5 BIG-IP, Imperva SecureSphere, Cloudflare WAF, Fortinet FortiWeb	Web, Network_Traffic, Intrusion_Detection
5	Network Access Control (NAC)	Controls device access to the network.	Cisco ISE, Aruba ClearPass, Fortinet FortiNAC, Forescout CounterACT	Endpoint, Inventory, Authentication
6	Endpoint Protection / Detection (EPP/EDR)	Protects endpoint devices from threats and monitors behavior.	CrowdStrike Falcon, Microsoft Defender, SentinelOne, Symantec, McAfee	Endpoint, Malware, Intrusion_Detection, Alerts
7	SIEM	Aggregates and analyzes security events and logs.	Splunk ES, IBM QRadar, ArcSight, Microsoft Sentinel	Splunk Audit Logs (internal), Alerts, Risk (ES model), All CIM models used for ingestion
8	Email Security Gateways	Filters and protects email communications.	Proofpoint, Mimecast, Cisco Secure Email, Fortinet FortiMail	Email, Malware, Alerts

#	Classification	Description	Examples (Vendors & Devices)	Applicable CIM Data Models
9	Secure Web Gateways (SWG)	Filters web traffic and protects against web-based threats.	Zscaler, Forcepoint, Cisco Umbrella, Palo Alto Prisma Access	Web, Network_Traffic, Malware
10	Data Loss Prevention (DLP)	Prevents unauthorized data exfiltration.	Symantec DLP, McAfee DLP, Microsoft Purview, Forcepoint DLP	Data Loss Prevention, Data_Access
11	Identity and Access Management (IAM)	Controls user identities and resource access.	Okta, Microsoft Entra ID, Ping, CyberArk PAM, IBM Verify	Authentication, Change, Alerts
12	Virtual Private Network (VPN)	Provides secure remote access via encrypted tunnels.	Cisco AnyConnect, Palo Alto GlobalProtect, Fortinet FortiClient VPN	Network_Sessions, Authentication, Network_Traffic
13	Threat Intelligence Platforms (TIP)	Aggregates and disseminates threat intel.	ThreatQ, Anomali, IBM X-Force, Recorded Future	Alerts, Intrusion_Detection, Event_Signatures (custom mapping may be required)
14	Network Detection and Response (NDR)	Detects threats from deep network traffic analysis.	ExtraHop Reveal(x), Darktrace, Vectra AI, Cognito, Cisco Stealthwatch	Intrusion_Detection, Network_Traffic, Network_Sessions
15	Deception Technology	Uses decoys and traps to detect adversary movement.	Attivo ThreatDefend, Acalvio ShadowPlex, TrapX, Smokescreen, IllusionBLACK	Intrusion_Detection, Alerts, Event_Signatures

Common Sourcetypes by Security Device Classification

Classification	Common Splunk Sourcetypes
Firewall	pan:log, cisco:asa, fortigate, juniper, checkpoint
Intrusion Detection System (IDS)	ids, snort, sourcefire, sur
Intrusion Prevention System (IPS)	cisco:sourcefire, paloalto:threat, fortinet:utm
Web Proxy / Secure Web Gateway	bluecoat:proxysg, zscalerenrich, symantec:webgateway, squid
Endpoint Detection & Response (EDR)	crowdstrike:event, carbonblack:json, sentinelone:events

Classification	Common Splunk Sourcetypes
SIEM (Log Aggregators)	Not applicable – Splunk is the SIEM
Email Security Gateway	proofpoint:tap, o365:exchange, mimecast, barracuda
Data Loss Prevention (DLP)	symantec:dpl, forcepoint:dpl, o365:dataloss
Threat Intelligence Platform (TIP)	threatconnect:event, misp:json, anomali:staxx
Network Access Control (NAC)	cisco:ise, aruba:clearpass
Vulnerability Management	nessus, qualys:hostDetection, rapid7:insightvm
Cloud Security Posture Management (CSPM)	aws:config, gcp:securitycenter, azure:securitycenter
Identity and Access Management (IAM)	okta:auth, o365:management:activity, azure:activity
Multi-Factor Authentication (MFA)	duo:authentication, okta:auth, azure:signinlogs
Deception Technology	attivo:log, trapx:alert, illusive:trap
